## About Instructional Planning & Delivery Module

One of the most essential competencies required by the teacher in Teaching Learning process is to plan and effectively deliver the instructions. For this, the teacher ought to know the subject matter to be taught, the learner characteristics as well as the strategies to develop the skills and abilities in the learner. This requires the teacher to understand the process of human learning and curriculum analysis in order to interpret correctly the expected learning outcomes for their accomplishment. This FDP focus on the principles of learning for designing instructional material and planning the total instructional process
