Sri Lalitha, Professor IT, GRIET</p>
Summary of the Event	<p>The “Menstrual Waste Management Hackathon - 2022” has been organized by Computational Intelligence Society (CIS), Student Chapter – GRIET in association with TSIC and Water Aid. Innovate 4 Menstrual Waste Management 2022 Hackathon in GRIET has broken the silence among the peers about menstruation, which is unfortunately still considered as a taboo even among the present generation. IEEE-CIS in association with TSIC has taken this initiative to come up with environment friendly solutions for menstrual waste. The teams which took part have immensely dwelled in the topic to bring out their inner engineer for creating the best solutions and gained a lot of insights from the judge panel present there.</p> <p>The hackathon aims to find solutions for treatment and disposal of used menstrual absorbents in a manner that is safe for the users (girls and women), environment friendly and can be up-scaled within current waste management systems and processes.</p> <p>A total of 7 teams participated in this hackathon with each team consisting of utmost 3 participants with at least one girl in their team. Initially participants were given time to get ready on what they needed to work on. There were 3 categories in which they could showcase their ideas and skills. Each team came up with their ideas and presented them to the judge panel.</p>

	1	N.Mounika	Assistant Professor		
Summary of the Event	<p>PlasticFreeDrive is organized on 12 May 2022 by Green campus wing of GRIET.</p> <p>Green campus' is a concept which stands for the efforts to establish environmentally sustainable practices in any institution. Its goal is to diminish the impact of ecological footprints by implementing the principles of sustainability at every level of institutional functioning.</p>				

	<p>GRIET's environment makes an aesthetic impression on those who step into the campus while simultaneously presenting the pedagogical/academics mission. Consequently, students along with faculty learn and live on and around campus to gain a new dimension to their learning and teaching experience and an increased appreciation of the natural world.</p> <p>GRIET has undertaken a "Green Campus" initiative seeking to take a holistic approach to campus sustainability. Its main focus is on campus flora fauna, solid waste management, alternative energy resources, etc.</p>

Faculty Names & Designation	Y Subbarayudu, Assistant Professor, KSM Lakshmi, Assistant Professor PK Abhilash, Assistant Professor N Mounika, Assistant Professor				

Summary of the Event	<p>Infosys Industrial / Field visit was started at 1:00PM from our GRIET in 2 college buses with 115 students and 4 faculties. We reached at 2:00 PM to the Infosys Gachibowli campus and then there was a security check done and they provided us with temporary passes. After entering the campus, we were welcomed by Miss Kavitha and Miss Prabha, the Facility Managers. Then we were divided into a group of 20 students with a guide for each. They showed us the campus and their Units where the development happens. At around 2:45 PM we were taken to the concept hall where we were offered some snacks and cool water to drink. Then Mr. Ravi Sharma, Project Manager gave an exciting and motivating session on Software development lifecycle concepts including waterfall, agile methods, product delivery scheduling, cloud and Microsoft Applications. He spoke on how any problem can be solved using Hybrid agile implementation that contains several steps like sprint, waterfall, discovery workshop and so much more. The one of our students described his project in detail and how it can be implemented in terms of Hybrid agile implementation. After the session concluded we gave back our temporary passes to the security and boarded the bus and reached our college back at 4:30PM</p>

OVERVIEW

International Conference on Innovative Computing, Informatics and Advanced Communication Systems(ICICIAC) focus on new emerging trends in Information Technologies with innovative computing approaches under Artificial Intelligence, Machine Learning, IoT, Big Data Technologies, Data Science, Robotic Vision Computing, Fuzzy approach, Autonomous Computing, and Urban Computing. The conference covers the scientific and technological aspects that relate to sustainable developments. ICICIAC-2022 fosters basic and applied research that can improve quality of life in current dynamic environment. The primary goal of conference is to bring together scientists, developers, and practitioners working in the field of advanced computing from academia and industries. The conference will create opportunities for collaborating at national and international level and networking among Indian and International Institutes to promote research.

ALL ACCEPTED PAPERS WILL BE INDEXED IN SCOPUS

CONFERENCE THEMES

TRACK 1: ADVANCED COMPUTING AND MACHINE LEARNING	TRACK 2: VISUAL COMPUTING
<ul style="list-style-type: none"> Supervised learning and Unsupervised algorithms in Data Mining, Machine Learning Big Data Analytics for Information and knowledge management Optimization Techniques in Machine Learning, Data Science Information Mining Fog Computing, Soft Computing 	<ul style="list-style-type: none"> Autonomous Vehicle Vision Computing Techniques Automated Medical Image Analysis Computer Vision for automated factory operation Robotic Vision computing Neural Architectures for Vision Computing Video Reasoning and Analysis Video Object Detection and Segmentation Techniques Deep Learning in Image and Video Processing Real world Image Analysis using AI and ML
TRACK 3: CYBER SECURITY ROLE IN REAL TIME ATTACKS	TRACK 4: IoT / UBIQUITOUS COMPUTING
<ul style="list-style-type: none"> Behavioral Information Security Fuzzy approach for Cyber-attack detection Security approaches at social media Zero trust security approaches Advanced Encryption and Decryption algorithms 	<ul style="list-style-type: none"> Body wearable devices and computing Adopting 5G in IoT Green IoT Smart cities deployment using IoT IoT in agriculture & Medical IoT

KEYNOTE SPEAKERS

Dr. Sri Devi Ravana
Associate Professor,
Faculty of Computer Sciences
and Information Technology,
Universiti Malaysia
Kuala Lumpur, Malaysia

Dr. Asadi Srinivasulu,
Professor of IT & Head Research,
Data Science Research Lab
BlaGres University- 91016,

Summary of the Event	<p>At the beginning of the event, participants were given a brief explanation about what FOSS is and what FSW functions upon.</p> <p>Then, questions were displayed and read aloud for the participants. Each question had three hints .There were three levels.</p> <p>Level 1:Easy-Peasy : In this level, each question carried 5 marks and usage of each hint deducted 1 mark from the question's score. Participants were given 120 seconds for each question of this level.</p>				

	<p>Level 2:Run-of-the-mill : In this level, each question carried 10 marks and usage of each hint deducted 2 marks from the question's score. Participants were given 180 seconds for each question of this level.</p> <p>Level 3:Sticky wicket : In this level, each question carried 15 marks and usage of each hint deducted 3 marks from the question's score. Participants were given 200 seconds for each question of this level.</p> <p>The participants had to send their answers to their respective FSW coordinators and the coordinators verified their answers and graded them the marks.</p> <p>The two highest scores were declared as the winners of "THE LEXEME QUEST"</p>

Summary of the Event	<p>People usually say that thousands of people die of cold, but we say that they die due to lack of woolen clothes and blankets. Poor and helpless people sleep in rags at footpath and roadside and die of cold. These poor people sleep close to each other during cold waves but how one can sleep sound without blanket or quilt in such conditions. They shiver due to cold breeze all the night and some old age persons die of these waves.</p> <p>The idea of the event is to collect the blankets and sweaters from the students of GRIET behalf of NSS team, the announcements were conducted in all the branches of GRIET. The execution is successful and we have collected more than 115 sweaters and blankets. The locations where the distribution conducted are at BASAWATARAKAM CANCER HOSPITAL, SRI PEDDAMMA TEMPLE, KPHB in HYDERABAD.</p> <p>The response is quite heart touching because homeless are feeling painful in the biting cold temperatures. All of them were happy to get the blankets and were also excited that now they would be able to have a sound sleep in cold nights. The initiative of NSS has a positive effect among the people. All the students and staff came forward to help such poor and needy people and gave them their clothes. All the poor beneficiaries appreciated an for what they did and thanked them for their human service and public interest.</p>

Summary of the Event	<p>The NSS Unit of GOKARAJU RANGARAJU INSTITUTE OF ENGINEERING AND TECHNOLOGY have conducted a Free COVID-19-Vaccination Drive in the campus on 10/12/2021. The drive was started at 11 AM in the morning and continued up to 3.00 PM.</p> <p>A team of COWIN technical staff and nurses arrived at the college premises at 10 am and the drive started around 11 am in the morning. The faculty members have very actively participated & monitored the students and staff in the drive throughout the day. The first vaccine was given to college students, as they inaugurated the drive.</p> <p>Later, other teachers, students, non-teaching staff of the college were vaccinated. The students, teaching and non teaching staff were given refreshments after getting vaccinated. They were given enough rest and then they are allowed to leave the hall. After getting vaccinated they downloaded the vaccination certificate from COWIN app.</p> <p>During this drive around 248 members of the institution including Students Faculties, non teaching Staffs have been vaccinated successfully till 3:00 pm. The NSS team cooperated greatly with the medical team and was provided with afternoon lunch.</p> <p>The team was very satisfied with this program initiated by NSS GRIET. All the necessary COVID precautions were taken by the NSS team throughout the day to ensure safety and the NSS GRIET team worked very hard to make this event successful. We take this opportunity to thank all the teaching and non teaching members who have supported us directly or indirectly.</p>

Summary of the Event	<p>Green campus event is organized on 4th December 2021 by Green campus wing of GRIET.</p> <p>Green campus' is a concept which stands for the efforts to establish environmentally sustainable practices in any institution. Its goal is to diminish the impact of ecological footprints by implementing the principles of sustainability at every level of institutional functioning.</p>				

	<p>GRIET's environment makes an aesthetic impression on those who step into the campus while simultaneously presenting the pedagogical/academics mission. Consequently, students along with faculty learn and live on and around campus to gain a new dimension to their learning and teaching experience and an increased appreciation of the natural world.</p> <p>GRIET has undertaken a "Green Campus" initiative seeking to take a holistic approach to campus sustainability. Its main focus is on campus flora fauna, solid waste management, alternative energy resources, etc.</p>

Summary of the Event	<p>The event started with the introduction of Speaker Dr. Tatiparti Padma. The session started at 10:30 AM which was attended by students and also the faculty. Ma'am started the talk by telling what is Biomedical Engineering and how is it related to engineering branches. There has been tremendous Growth in Biomedical Department since the start of the Corona Virus. Many devices have been developed for measuring the bio</p>				

	<p>signals in the human body like EEG Sensor, Inertial Sensor, Blood Pressure Sensor, Pulse Oximetry Sensor, and many more Biomedical Devices. IoT is a network in which all physical objects are connected to the internet through network devices or routers and exchange data. Internet of things (IoT) plays a major role in Biomedical Engineering, Data is being collected by sensors through Intra-BAN communications this data through Inter-BAN communication like 3G/4G communications being sent to medical staff, medical server and Ambulance so immediate actions could be taken by doctors by taking patients health profile into consideration She mentioned that it is a good and intelligent technique which increases the chance of protecting Patients. She then explained about Biomedical Signal Processing and how is it actually performed their application areas and the advantages of using them.</p> <p>After the seminar, there was a Q&A session in which students asked various curious questions regarding biomedical engineering followed by a token of appreciation to Padma ma'am by Sridevi ma'am.</p>

Summary of the Event	<p>INSOFE is vibrant and transformative Educational School for engineers. Their machine learning engineers are incubating products. All the AI specialists are pushing the boundaries through applied research. The faculty or students trained through this path are leading data scientists now and INSOFE is engaged with enterprises to help them adopt data science.</p> <p>Their motive is to Inspire, Educate and Transform Academics, with AI and ML applied on all disciplines of Engineering. They made us explore opportunities that are ahead with Data Science integration. The scope for each engineering discipline when integrated with Machine Learning is explained with examples.</p>

<p>Summary of the Event</p>	<p>This course on "Computer Vision With Arduino" delivers the basics of how to create real-world Computer Vision applications using the extremely popular Arduino Microcontroller. The Session is about basic exercises and move on to creating exciting projects such as Lamp Gesture Control, PID Face Tracking, Angle Finder, Hand Gesture Control, Color Sorter with Conyeor belt, and a lot more. The aim of this course is not to create random projects. But to understand the fundamentals and to give you enough knowledge and experience so you can build your own million-dollar ideas. The Course has a clear pathway from basic to advanced with lots of practice examples.</p> <ol style="list-style-type: none"> 1. Introduction- Arduino Basics 2. Introduction- Arduino Sensor 3. <p>Summary of the Event</p>	<p>A webinar has been conducted on “Making Productivity a Habit” on 7th September 2021 for III year students, organized by WDC team of GRIET. The content delivered in the webinar is as follows:</p> <p>It’s tempting to look at highly productive people as machines (or wizards). But by studying how they work efficiently and overcome the challenges we all experience, it’s possible to boost your own productivity as well. How do the most efficient people overcome challenges like:</p> <ol style="list-style-type: none"> 1. Procrastinating on tasks—both small, nagging ones and large, challenging ones 2. Boring work that needs just to get done 3. Responding to email and other messages while working 4. Staying motivated and energized throughout the entire work day 5. Focusing and finishing the most important projects on their plates <p>As much as I would like to claim the status of “highly productive person,” the best I can do is say: I’m working on it. But from reading articles, checking out books, and asking questions of productive people, I’ve pulled together the best advice I could find on their productivity habits. What follows are 18 of the most important habits of highly productive people. From ways to spend less time on emails to methods of staying focused, these productivity tips can help you maximize your efficiency — and get more done. You can’t become more productive overnight. But if you make small changes and put some of these habits into place, you’ll be well on your way to becoming more efficient.</p>

EVENT SUMMARY RPEORT

Nature of the event (Workshop / FDP / Seminar / Guest Lecture / Talk GD/ Training Program / Quiz / Presentation)	Workshop
Title/Theme of the Event	One day hands-on workshop on Database Management and Application Development
Details of the Coordinator	Dr.K.Ravikiran Associate Professor IT Department
Date on which the Event was held	30 th September 2021
Details of the Speaker/Guest Name Designation Mail Id	Mrs.Pravallika Executive Committee Member, Swecha Manager, Advanced Analytics at PepsiCo. Former Data Analysis Specialist at Verizon mailto:pravallika.achyuthuni@pepsico.com
Details of the Speaker/Guest Name Designation Mail Id Contact	Ms.V.Ravali Full Stack Developer at Swecha Alumni of GRIET ravali@swecha.net 9014423211
Target Audience (Teaching Faculty / Non-Teaching Faculty / Students)	Students of all branches(III year)

No. of Students attended	140
Guest Profile	Ms.V.Ravali is currently working on a localization project which is an intelligent virtual assistant supporting Telugu and Urdu languages
Summary of the Event	<p>The main aim of the workshop was to introduce students to the Free and Open Source Software NocoDB which is a tool to turn any database into a smart Spreadsheet. The one day hands-on workshop had two sessions. In the initial 2 hour session Mrs.Pravallika gave an introduction to database management and a demonstration of NocoDB Software. Later Ms.V.Ravali in her talk emphasized the importance and advantages of Free and Open Source Software with specific examples. The afternoon session gave the attendees a hands-on experience of NocoDB which continued for 2 hours. The workshop was received with admiration by the students The event ended with vote of thanks to the guests.</p>

Summary of the Event	<p>On 7th September 2021, Gokaraju Rangaraju Institute of Engineering and Technology, Hyderabad organized a blood donation camp, the initiative was taken up by the NSS unit of the college in accordance with the Red Cross.</p> <p>The team from the Red Cross including one doctor and a few nurses arrived at the school premises before the scheduled time and the program was started exactly at 10:00 as earlier notified.</p> <p>The first initiative of donating blood was taken by the college students, as they inaugurated the blood donation camp.</p> <p>Later, other teachers, students, non-teaching staff of the school, and alumni students all donated blood. The donors were given refreshments after they donated blood. The donors were also provided with the blood donating certificates by NSS GRIET.</p> <p>A total of 83 units of blood was collected in total and the program went on till 2:30 pm. The NSS team cooperated greatly with the medical team and was provided with afternoon lunch. The team was very satisfied with this program initiated by NSS GRIET. All the necessary COVID precautions were taken by the NSS and the Red Cross team throughout the day to ensure safety of both donors and volunteers.</p> <p>Despite the unfavourable Pandemic upon us, many people took time out of their lives to come forward and donate blood today for the greater good, and the NSS GRIET team worked very hard to make this event successful.</p>
