<b>Summary of the Event</b>	TEDxGRIET hosts its 5 <sup>th</sup> Season on 23 <sup>rd</sup> September 2023 . TEDxGRIET Season5 theme is about PERSPECTIVE 2.o. The way you look at things differently with a greater PERSPECTIVE of change that's 2.o.This year TEDXGRIET has a lineup of 8 speakers and two band performances. The speakers are as follows – Deepthi Ravula- CEO of We Hub Anup Yama – Athlete Roller skater Uma Sudhir -Resident editor at NDTV Ahmed Ashfaq – Food vlogger Anuradha Thota – CEO of Blackbuck engineers Ratnavalli Kottapalli – Vice president of Thalassemia and sickle cell society Nikhil Vijendra Simha- YouTuber Vedala Hemachandra – Indian playback singer Band ganesh live Band retrieve All the eight eminent speakers gave their insight full thoughts on our theme. All the participants were very enthusiastic throughout the event.

<b>Summary of the Event</b>	<p>Each year the International Day of Peace (IDP) is observed around the world on 21 September. The UN General Assembly has declared this as a day devoted to strengthening the ideals of peace, through observing 24 hours of non-violence and cease-fire. Never has our world needed peace more.</p> <p>This year's theme is Actions for Peace: Our Ambition for the #GlobalGoals. It is a call to action that recognizes our individual and collective responsibility to foster peace. Fostering peace contributes to the realization of the Sustainable Development Goals (SDGs) and achieving the Sustainable Development Goals will create a culture of peace for all.</p> <p>United Nations Secretary-General António Guterres said, "Peace is needed today more than ever. War and conflict are unleashing devastation, poverty, and hunger, and driving tens of millions of people from their homes. Climate chaos is all around. And even peaceful countries are gripped by gaping inequalities and political polarization.</p>

<p><b>Summary of the Event</b></p>	<p>The esteemed CIS/GRSS Joint Chapter, IEEE Hyderabad Section, in collaboration with the Department of CSE, JNTUH-UCESTH, and GRIET CIS SB Chapter, successfully organized John McCarthy Memorial Lecture (JML). The event, titled "Inside the BlackBox: Deep Learning with Sparse Coding, Additive Features, and Nonnegative Matrix Decompositions," was held on September 15th from 3:15 pm to 5:15 pm. The speaker of the event is Prof. Jacek M. Zurada, an IEEE Life Fellow from the University of Louisville in Louisville, Kentucky, USA.</p> <p>Jacek M. Zurada (M'82-SM'83-F'96-LF'14) serves as a Professor of electrical and computer engineering with the University of Louisville, Louisville, KY, USA. He has authored or co-authored several books and over 450 papers in computational intelligence, neural networks, deep learning, logic rule extraction, and bioinformatics cited over 18,000 times (Google Scholar), and delivered over 120 presentations throughout the world. He has served as a Distinguished Speaker for three IEEE Societies. Dr. Zurada has been a Board Member of the IEEE, IEEE CIS, IEEE CSS and of INNS.</p> <p>The event, offered attendees a unique opportunity to experience the future of data representation. Deep neural networks (DNN) had long grappled with issues related to transparency and complex mappings in discriminative data representation. However, during the event, experts unveiled cutting-edge techniques that addressed these challenges, ultimately bidding farewell to the complexities caused by cancellations of positive and negative terms. These breakthroughs ushered in a new era of clarity and efficiency in the computation process.</p> <p>Throughout the event, attendees witnessed the demystification of the world of DNN as its true potential in data analysis was unlocked. Learning with meaningful constraints and the implementation of sparse coding techniques left a profound impact on feature extraction. By imposing limitations and emphasizing sparsity, distinctive and sparse discriminative features were extracted from the data. These features became essential components of the original sets of objects and were visually represented as sparse basis vectors.</p> <p>Furthermore, the integration of sparse basis functions, such as receptive fields or filters, enhanced transparency by effectively overlaying and reconstructing them with minimal reconstruction error. This approach ensured a clear and comprehensive understanding of the underlying concepts, marking a significant milestone in the field of data representation.</p> <p>Overall it was an interactive session where attendees had the opportunity to ask questions, and the professor kindly addressed them, creating a friendly atmosphere. At the end of the event, Professor Jacek M. Zurada was honored and facilitated by the advisors and heads of departments from JNTUH and GRIET</p>
<p><b>Expenditure (in rupees)</b></p>	<p><b>Rs. 1250</b></p>

<b>Faculty Names &amp; Designation</b>	Dr.N.Ganapathi Raju Professor & HOD Department of IT				
<b>Summary of the Event</b>	An awe-inspiring journey that spans 25 series of events, spreading its wings across 18 states in India. Join us as we explore the transformative power of blockchain technology in both FinTech and Non-FinTech sectors. From Programmable Money and Payments to Capital Markets and Digital Asset Tokenization, from Manufacturing, Supply Chain & Logistics to Energy and Sustainability, from E-Governance (GRC) to Entertainment & Media, and beyond, we will delve deep into a myriad of industry verticals. India's first of its kind tech tour focused on Web3 and Blockchain, dedicated to narrating India's remarkable Blockchain Story and shifting the narrative from hype to value creation. This unique platform brings together 200+ exceptional speakers and panelists, including Blockchain policymakers, industry leaders, blockchain architects, and esteemed researchers from academia.
