Session Response: Good

WIPRO TECHNOLOGIES

Profile:

Wipro Ltd (NYSE:WIT) is a global information technology, consulting and outsourcing company with 145,000 employees serving over 900 clients in 57 countries. The company posted revenues of $6.9 billion for the financial year ended Mar 31, 2013.

Wipro helps customers to do business better leveraging our industry-wide experience, deep technology expertise, comprehensive portfolio of services and a vertically aligned business model. Our 55+ dedicated emerging technologies 'Centers of Excellence' enable us to harness the latest technology for delivering business capability to our clients.

Wipro is globally recognized for its innovative approach towards delivering business value and its commitment to sustainability. Wipro champions optimized utilization of natural resources, capital and talent. Today we are a trusted partner of choice for global businesses looking to 'differentiate at the front' and 'standardize at the core' through technology interventions.

In today's world, organizations will have to rapidly reengineer themselves and be more responsive to changing customer needs. Wipro is well positioned to be a partner and co-innovator to businesses in their transformation journey, identify new growth opportunities and facilitate their foray into new sectors and markets.

Milestones:

Wipro, one of the world's most trusted brands, is a name with a long history. Here's a snapshot of our journey to date:

- Established in 1945 as Western India Vegetable Products Limited in Amalner, Maharashtra
- IPO for capital in February 1946
- Ventured in to the fledgling IT industry in 1981
- Established software products and exports subsidiary, Wipro Systems Ltd. in 1983
- Pioneers in marketing indigenous Personal Computers in 1985
- Established a Joint venture with GE in 1989
- Entered IT services in the 1990s - we were among the pioneers in developing the ODC (Offshore Development Center) concept
- Software business assessed at SEI-CMM Level 5 in 1998
- Listed on NYSE in 2000 (NYSE:WIT)
- The first company in the world to be assessed at PCMM Level 5 in 2001
- Entered the BPO business in 2002
- Entered the Eco-energy business in 2008

The Spirit of WIPRO:

The Spirit of Wipro is the core of Wipro...
The Spirit is rooted in current reality, but it also represents what Wipro aspires to be thus making it future active. The Spirit is an indivisible synthesis of all three statements. It means manifesting Intensity to Win, acting with sensitivity and being unyielding on integrity all the time.

- **Intensity to win**
- **Act with Sensitivity**
- **Unyielding Integrity**

Intensity to win

Make customers successful.   Team, Innovate, Excel.

- This is the desire to stretch, to achieve that which seems beyond our grasp. This is aiming for maximum. This is the ardour to do our best, the hunger to be the best. This is the devotion to challenging our limits, it is about realizing our potential, and about expanding our potential.
- It is not about winning at all costs. It is not about winning every time. It is not about winning at the expense of others.
- It is about working together to create synergy. It is realising that I win when my team wins; my team wins when Wipro wins; and Wipro wins when its customers win, when its stakeholders win.
- It is about innovating all the time. It is a continuous endeavour to do better than last time.
- It is the Spirit of fortitude, the Spirit of never letting go... ever.

Profile of the Speaker

Hi Madam,

I am Srikar Ananthula, working as a "Project Engineer" in Wipro Technologies, Hyderabad. I am passionate technology enthusiast, I volunteer for "Mozilla" and got selected as official "Mozilla Rep" (REMO) Representative of Mozilla, WebFWD Scout for Mozilla WebFWD Program, which help the open source innovators change the world.

My linkedin profile link: http://in.linkedin.com/in/ananthulasrikar

1.   Who are we?

We are from Mozilla Communities, part of Official Mozilla Organization where we have been localizing the ideas and missions of 'Mozilla' in and around India besides discussing its contribution to the Web Development by doing events & meetups and campaigns in about tens and thousands of educational Institutions all over the world.

You would like to probably have a look at our official webpage of REMO. On behalf of the Mozilla, I would love to take couple of sessions in your college. We could

probably describe it as an interactive/fun session rather than discussion. As of now hundreds of colleges in India we have been doing all round the world.

2. Do we charge anything?

Absolutely no. Since we are a non-profit and web loving organization we would take the session for **free of cost**. We will not be profited with single rupee for doing all this. This is all on volunteer basis, for the betterment of society in technical aspects and makes them aware of what we have.

3. Why we selected your college as a platform to interact?

Vision & Mission:

·   To be among the best of the institutions for engineers and technologists with attitudes, skills and knowledge and to become an epicenter of creative solutions.

·   To achieve and impart quality education with an emphasis on practical skills and social relevance.

We loved the vision & mission of the college and we want your college students to participate and contribute to Open Source Projects which are going to rule the world, in which any program source code is Open, where anyone can hack, add something useful and publish it again.

I think I don't need to explain much about Open Source and Its value towards the career of the students in various aspects because you may already aware off.

A student named Mukesh Thodupunoori, perusing his 3rd year, IT Department was Firefox Student Ambassador was very active and interested to start Mozilla activities in college.

Hence we choose your college as a platform to interact.

4. Agenda for the session.

The key points which are to be discussed in the session as follows:

➢ Introduction to Mozilla & its Products (30 min Approx.)

- ➢ Web-Making Session. (Good for 1st and 2nd years in order for easy learning of Web using Mozilla WebMaker tools) (Need good bandwidth internet connection, 45 min)
- ➢ Firefox OS Introduction and Few Demos (1hour)
- ➢ Different ways of Contributing Mozilla (45 min)
- ➢ Benefits of contributing to the projects. (30 min)
- ➢ GITHUB Usage to get started into open source projects. (30 min)

Above mentioned timings are for general estimation only, may vary also, can be adjusted if time limit is the constraint.

And finally we should promise lots of Goodies/Swags from Mozilla. T- Shirts, Creative Batches, Layard's for the active participants:

Please have look on my previous events and meetups. http://mozillaclubhyd.blogspot.in/

Please don't hesitate to get back for any kind of information and clarification if required.

Looking forward for your positive response.

Thanking you & Regards,
Srikar Ananthula,
